

SENSATO

Sensato provides holistic cybersecurity solutions with an integrated platform to comply with cybersecurity regulations and best practices, detect attacks, and respond to threats quickly.

NCHA Strategic Partners

Sensato's Full-Stack Cybersecurity Solution

Nightingale™ Cybersecurity Solution - providing real-time monitoring of your network, medical devices, and IoT allowing you to manage compliance, detect threats, and respond to incidents thus increasing defensibility and reducing liability.

Medical Device Cybersecurity Operations Platform (MD-COP) – Medical devices are a prime target for cyberattacks. MD-COP helps you understand your medical device security risks and policy gaps, deploys breach detection, evaluates medical device manufacturer risks, and more.

Tactical Cybersecurity Operations Center (CTOC) – Trust the experts to monitor your networks 24x7 and alert you to potential incidents and assist in the response. CTOC experts take the burden off your IT team by providing robust threat detection and response.

Cybersecurity Advisory Services - Focused on effective approaches that ensure cybersecurity success. A suite of training and simulations that will elevate your cybersecurity strategy to the next level.

- **Incident Response Training** - Designed to help organizations develop plans, procedures, and skills required to respond to a cyberattack effectively. This program is based on stopping current cyberattack methods.
- **Penetration Testing** – A modern testing approach that is designed to identify vulnerabilities in your network cybersecurity.
- **Tabletop Simulation** - Stages a realistic cyberattack simulation including real-life scenarios based on the latest cyber intelligence. The simulation uncovers areas for improvement.
- **Cybersecurity Capability Maturity Model** – Evaluate your cybersecurity risk and understand what is needed to define an aligned strategic cybersecurity plan and roadmap.

Sensato's mission is to help hospitals stand between good and evil – it is what drives us to prepare and perform as if lives depend on us. We believe they do. We would love to help you with your holistic Cybersecurity Strategy to stop cybercriminals before they get access to your network and patients.
