

SENSATO

CRITICAL ACCESS AND RURAL HEALTH CYBERSECURITY PROGRAM

The only cybersecurity program designed specifically for you!

Attackers don't discriminate based on a hospital's size or location. Critical Access and Rural Hospitals face the same challenges associated with larger hospitals. Regardless of the challenges, the need to comply with best practices, detect and defend the healthcare organization, and respond to incidents is paramount.

The Sensato Critical Access and Rural Health (CARH) Cybersecurity Program combines a fully integrated cybersecurity platform with 24x7 "eyes-on-glass" monitoring, medical device security, incident response, policy and procedures templates, and much more.

Sensato, focused on cybersecurity for healthcare, brings a comprehensive solution crafted to take the burden off your team to meet the needs of your critical access and rural hospital environment so that you can remain focused on patient care.

NCHA Strategic Partners

SENSATO

I keep telling our Governing Board and the Senior Leadership Team that we don't know who or what could be on our network because we don't have the means to monitor it. But now, with the help of Sensato, we do!!! This is a CIO's dream come true!"

Tim Hiatt - CIO
Brodstone Memorial Hospital

How the Sensato™ CARH Cybersecurity Program Meets Your Unique Needs

A fully-managed cybersecurity program to help you safeguard your patients' lives

Advanced Cybersecurity Solution

- Security for servers, networks, and medical devices
- Reduce the workload of your existing IT team with a fully-managed solution
- Assess cybersecurity maturity and identify security risks and policy gaps
- Detect threats with deception and breach detection technologies
- Perform annual vulnerability and risk assessments

24x7 Monitoring and Incident Response

- Sensato Cybersecurity Tactical Operations Center (CTOC) saves resources and improves effectiveness by monitoring for you, 24x7
- Receive advanced threat detection and incident response
- Strengthen your security capabilities – The Sensato team will partner with you and support you through every step of the process

Full Stack Cybersecurity Solution for Critical Access and Rural Hospitals

We believe truly effective cybersecurity requires a combination of cybersecurity software, 24x7 monitoring by a trained and dedicated team, robust protocols, defined policies and procedures, governance, and end-user training. Bringing these components together into a single integrated solution is the Sensato full-stack cybersecurity solution.

Fully Integrated/Connected Platform

- Automated countermeasure capabilities provided to aid in remediation
- Detect breaches within minutes

Cost-Effective Subscription Model

- Save money with the cost-effective and comprehensive cybersecurity toolkit
- Eliminate local resource requirements with a fully managed end-to-end solution

Rapid Deployment

- Designed for quick and easy deployment, saving you resources, costs, and time
- Utilizes Sensato "Over-the-air-framework" for remote deployment
