This is not another help desk. We are a true asset to help protect your organization.

The Sensato-CTOC provides industry-leading cybersecurity management across cloud, on-site, and hybrid environments.

Deployment is fast and customized to your organization’s unique needs.

Sensato-CTOC operates with a unified threat management approach, providing security and support in three core areas:
SENSATO-CTOC

Multiple essential security capabilities in one offering.

Sensato Cybersecurity Tactical Operations Center (CTOC) is a command post for managing and responding to cyberattacks. Avoid the time, expense, and resources required to deploy and maintain multiple-point security solutions across your infrastructure.

CTOC Unified Threat Management Approach:

**ASSESS & MONITOR**
Centralize and simplify security monitoring across your organization
- Asset discovery: Visibility into the devices that show up on your network and running in your cloud environments
- Behavioral monitoring
- Continuous threat intelligence and monitoring
- Log management

**DETECT & RESPOND**
Incident response planning and response support
- Intrusion detection
- NIDS and HIDS included
- Vulnerability management
- Security Information and Event Management (SIEM): Real-time analysis of security alerts generated by applications and network hardware

**STAY UP-TO-DATE**
Access Sensato's on-going intelligence gathering and sharing
- Continuous, automatic threat intelligence and briefings
- Sensato’s CTOC monitors traffic on client networks for quick detection of suspicious behavior
- Threat intelligence capability based on intelligence community methodologies

Our CTOC provides industry-leading cybersecurity management across cloud, on-site, and hybrid environments. Deployment is fast and customized to your organization’s unique needs. Designed, outfitted and staffed to address the complex cybersecurity requirements of healthcare and critical infrastructure organizations.
