

## CAROLINAS HEALTH INNOVATION INSTITUTE

# Executive Summary

*Presented by Brasco ///*

Healthcare spending has grown at an unsustainable pace. While costs are escalating, health outcomes are worsening. A large contributor is a fragmented care system. COVID-19 has exposed inequalities and shortcomings, while only widening the gap. By stitching together component funding and aligning efforts across the healthcare spectrum, we can develop a more equitable, sustainable system of care that **alleviates uncertainty and creates a more level playing field.**

The Carolinas Health Innovation Institute (CHII), designed to serve as a common thread, offers the infrastructure to support necessary reforms to our healthcare system. CHII's purpose is to redefine systems of care to equitably and sustainably meet the health needs of the Carolinas.

### WHO WE HELP:

- › Health Systems
- › Independent & Rural Hospitals
- › Non-Profits Involved in Healthcare
- › Healthcare Payors
- › State Government Agencies
- › Policymakers & Legislators
- › Health Funders

### WAYS WE SUPPORT:

- › **Unite** promising practices with policy changes needed for sustainability
- › **Innovate** and test solutions to validate data for policy and systems change
- › **Design** payment pathways so that funders can act as seed capital for payor commitment
- › **Present** research and evaluation support for new care delivery models to ensure equitable care in underserved communities
- › **Develop** a shared agenda that amplifies community voices to executives and/or legislators
- › **Discover** new opportunities to invest in through environmental scanning
- › **Empower** community voice to realize return on investment
- › **Provide** shared incentives/opportunities for co design such as risk free pilots and demonstrations to develop models of care worth paying for

We are looking to engage partners to better understand needs, evaluate promising practices, and co design innovative solutions that ensure equity in health.
