

NORTH CAROLINA HEALTHCARE FOUNDATION

The North Carolina Healthcare Foundation (NCHF) is the charitable non-profit affiliate of the North Carolina Healthcare Association.

Mission

To foster and accelerate the collective impact of hospitals, health systems, and community partners to improve the health of North Carolinians.

Vision

A North Carolina where high-quality healthcare is accessible for all.

Purpose

To leverage the reach and access of NCHA to promote and accelerate the role of hospitals in being change agents in their communities.

NCHF advances its purpose by serving as a hub for discovery and collaboration, providing capacity building assistance, performance improvement coaching, data and evaluation support, and leadership development, including the growth of diverse healthcare leaders.

NCHF focuses in specific areas to achieve two overarching goals:

Couple member voice with qualitative discovery to co-design new sustainable models of health.

Ensure hospital and health system success in providing safety net services.

Areas of Focus:

Access to Health

Empowering communities to take control of their health by ensuring access to appropriate and affordable care, regardless of race, socioeconomic status, or geographic location.

Equity of Care Delivery

Using education, collaborative learning, coaching and uniform metrics to ensure that patient care varies based on patient need – not race, ethnicity, or language.

Behavioral Health

Leveraging and coordinating resources to ensure behavioral healthcare is as accessible as any other medical care in North Carolina.

Rural Health

Redesigning models of care that support the unique needs of North Carolina's rural communities.

Diverse Healthcare Leaders Mentorship Program

NCHF is committed to building a diverse pipeline of underrepresented men and women into leadership roles by connecting high-achieving healthcare professionals to leaders willing to share their knowledge and experience and modeling a framework for professional growth and development.

CaroNova is a strategic initiative of NCHF, in partnership with the South Carolina Hospital Association and The Duke Endowment.

CaroNova's Purpose: To align leaders across the Carolina's in pursuit of a better and more equitable system of care.
